

TcpEventListener

```
classDiagram
    class TcpEventListener
    class TcpClientEventListener
    class TcpServerEventListener
    TcpClientEventListener --|> TcpEventListener
    TcpServerEventListener --|> TcpEventListener
```

The diagram illustrates a class hierarchy. At the top is the 'TcpEventListener' class. Below it are two subclasses: 'TcpClientEventListener' on the left and 'TcpServerEventListener' on the right. A horizontal line connects the two subclasses, with a vertical arrow pointing upwards from the center of this line to the 'TcpEventListener' box, indicating that both subclasses inherit from the base class.

TcpClientEventListener
